RE: Executive Summary – Proposal from the Department of Family and Consumer Sciences for the new Food and Nutrition Management Sequence

The University Curriculum Committee has approved and is forwarding for Academic Senate consideration the proposal to add a new Food and Nutrition Management Sequence in the Major in Food, Nutrition and Dietetics.

The Department of Family and Consumer Sciences has given a rationale for adding the new sequence:

- Beginning fall 2016, the Department of Family and Consumer Sciences began offering Food, Nutrition and Dietetics as a major rather than a sequence.
- When they went through the process of elevating the sequence to a new program, they neglected to also transition the options (1. Dietetics and 2. Food and Nutrition Management) to sequences.
- This proposal is a request to elevate the option of Food and Nutrition Management to a sequence. No additional hours or courses are being added at this time.

The University Curriculum Committee supports the proposal to add this new Food and Nutrition Management sequence in the Major in Food, Nutrition and Dietetics.
