-

**Did a majority of your faculty approve this title change?**

No

**Are you requesting to add a NEW Sequence to an existing major?**

Yes

**Brief rationale for requested change(s).**

The creation of a Master of Science in Education (MS Ed) Deaf and Hard of Hearing (DHH) sequence is both a timely and necessary response to a critical shortage in the field of deaf education. Across Illinois and nationally, students who are deaf or hard of hearing are increasingly being taught by unlicensed substitute teachers due to a significant lack of qualified professionals. This shortage not only compromises students' access to equitable, high-quality instruction but also places school districts in untenable and unsustainable staffing positions.

In direct response to this crisis, nine school districts across the state have formally endorsed the development of this graduate-level program. Notably, Chicago Public Schools (CPS) has expressed a strong interest in collaborating to fund a dedicated cohort of graduate students beginning in 2026. This level of external support underscores both the urgency and the feasibility of implementing a targeted preparation program for teachers of the deaf and hard of hearing.

The proposed DHH MS Ed sequence will prepare graduate students to meet the diverse academic, linguistic, and social-emotional needs of children who are deaf or hard of hearing.

This interdisciplinary sequence provides teachers of the visually impaired and teachers of the deaf with knowledge and skills to meet the unique needs of infants and toddlers who have sensory disabilities and their families. While the program will provide an overview of the impact of sensory loss on early development, an intense focus will also be provided on language, communication, and feeding issues common to this population. A variety of practicum and clinical experiences with children and families will allow students to apply knowledge and skills to professional practice.
