The M.A., M.S. in archaeology is flexible 33-hour program culminating in a master's thesis. All students take a common core of four courses (ANT 386, 460, 481, and 488) in addition to 6 hours of Master's Thesis (ANT 499). In consultation with the graduate advisor and committee chair, each student chooses a sequence in prehistoric, historical, or biological archaeology electives, and a thesis topic based on his or her individual interests.

Concentrations

Students must declare a concentration and take one of the following required courses: Prehistoric Archaeology (ANT 301), Historic Archaeology (ANT 388), Human

Osteology (ANT 371), or Human Paleopathology and Skeletal Analysis (ANT 372). In consultation with and approval of the advisor, students will create an individualized curriculum and complete a minimum of 9 hours of coursework at the 300 or 400 level in anthropology or approved courses in related disciplines.

Admission Requirements

15

Admission to the program will require students to have completed a bachelor's degree in anthropology, history, geography, or a related field. Students with undergraduate degrees in related fields may apply for admission to the program, and, working with an advisor, they can devise a plan of study that allows them to overcome their educational deficiencies. Applicants must also have at least a 3.0 GPA (on a scale which A equals 4.0) for the last 60 hours of undergraduate work and submit scores from the General Test of the Graduate Record Examination. A personal statement of purpose and two letters of recommendation must be submitted separately to the Coordinator, Master's Program in Archaeology, Department of Sociology and Anthropology. Applications and supporting materials must be received by March 1. Admission to the program is allowed in the fall semester only.

PART A: PROGRAM DESCRIPTION AND EXPLANATIONS

Institution: Illinois State University

Responsible Department/College: Department of Sociology and Anthropology/CAS

Program title: MA in Anthropology Date of implementation: August 2012

Description of proposed program change:

1) We intend to broaden the M.A./M.S. degree beyond archaeology to general anthropology.

2) We will formally Disestablish our current Master's Degree in Archaeology program concurrently with proposing our new Master's Degree in Anthropology (which will now subsume the older degree). No archaeology courses will be discontinued so this program should not adversely affect any currently enrolled student. After passage of the new M.A. degree, current students will have a choice of finishing under the old program title or request admission to the new Anthropology master's degree program and apply all of their previous courses toward the new degree.

- 3) Our program will allow students and their professor-advisors to create concentrations in the new general anthropology master's program, using the strengths of our resources and expertise of our faculty. Five concentrations will be offered: prehistoric archaeology, historical archaeology, bio-archaeology, cultural anthropology, and Japanese studies However, in consultation with the graduate advisor, a student may design an additional individualized program utilizing the expertise of the University and the department.
- 4) We wish to create an individualized and flexible degree program by minimizing the number of core courses to five in each area of concentration, yet still allowing for at least four electives.
- 5) We will continue to require a Master's Thesis of at least six hours.
- 6) We will not require a final comprehensive or qualifying exam.

Rationale for proposal:

The Master's Degree in Historical Archaeology began in 2002 after almost a decade of proposals and review. In 2009 we proposed expanding this program to also include prehistoric archaeology, and it was approved. However, because of some fortuitous circumstances, hires, and physical expansions, our faculty expertise and numbers have increased dramatically recently. These recent personnel changes now make expanding our MA program to include all the subfields of anthropology to be the next logical step in our growth and development as a program. Also, broadening our Master's program will increase the number of our students—an issue our small-niche historical archeology program struggled with—and will involve all of our faculty. But, more importantly, we believe that this degree will be of great benefit to students who will be able to participate in a unique and individualized anthropology program that they would not be able to get at other universities in the area.

We feel that there are five reasons why now is the time to move forward in implementing a general anthropology master's degree. First, there is great talent in our expanded anthropology program, and we wish to utilize this to the fullest. Our chair, Fred Smith, is one of the world's foremost authorities on Neanderthals and human evolution, and is immediate past-president of his national association. James Skibo is likewise an

MS

internationally recognized expert on pottery use and analysis, and is an editor of a major journal of archaeological theory. Gina Hunter specializes in gender and medical issues, and has been at the forefront of the national "ethnography of the university" project. Elizabeth Scott is a noted authority in historical archaeology and zooarchaelogy, specializing on French settlements in the Midwest. Nobuko Adachi is well-published in the field of transnationalism and Japanese immigration and ethnic studies. James Stanlaw, a linguistic anthropologist, specializes in the developing discipline of cognitive science. Our two newest faculty members, Maria Smith and Kathyrn Sampek, specialize in biological anthropology and archaeology respectively. Dr. Smith has an established reputation in the fields of osteology and biological archaeology, while Dr. Sampek, though recently out of graduate school, already has a strong research agenda on the political economy, Cherokee and other Native American cultures, and several substantial publications to her credit.

Second, we believe that there is great potential demand for such a flexible, individualized program in anthropology in the Midwest. While other universities in Illinois offer terminal master's degrees in anthropology, none does so with such a particular and specialized flavor. Illinois State presents itself as a large university with a small liberal arts college atmosphere; our program which emphasizes to utmost, primary attention to a student's needs and goals, certainly fits this ideal. Even a cursory survey of our own students on campus, or those in related social science disciplines, indicate that there is a market for this kind of degree, and the potential growth in demand. Such a flexible program as the Master's program proposed here benefits potential students as they can create or choose an program of study that meets their diverse interests and needs. In general, two types of students would be interested in a terminal Master's program such as this: (1) those who seek employment where a terminal degree is recommended or required (such as in government or public service; state, local, or national museums; or selected companies in the private sector), and (2) those who want to continue on to the Ph.D. This varied and individualized program would satisfy both constituencies. Our graduates will have diverse backgrounds, with potential skills from a broad range of specializations including, prehistory, biology, ethnology, mapping, field linguistics, social theory, artifact storage and curation, and osteology. And our department has a long tradition of offering a variety of field schools, which is very desirable training for both employers and graduate schools, which would make our graduates very marketable. Our several prehistoric and historical archaeological field schools are being expanded to including training in paleoanthropology, bioarchaeology, and cultural anthropology. Thus, we feel our revised Master's program is flexible enough to respond to a diverse and often changing market.

Third, we believe establishing a general master's degree in anthropology will not only blend our two historic and prehistoric archaeology programs together, it would be pedagogically and theoretical sound as well. That is, we propose not having three degree concentrations in archaeology as we have now; instead these would be subsumed as concentrations in a broader single degree. Anthropology as a discipline is characterized by great diversity, studying all aspects of humanity from their first appearance to contemporary language and cultures. We would like to revise our master's degree to

reflect and incorporate this diversity, and allow students to develop a course of study that could draw on all four of anthropology's subfields of cultural anthropology, archaeology, biological anthropology, and linguistics, to make a specialized graduate program that would rival the offerings of larger institutions.

Fourth, this new master's program articulates very well with our well-established and very successful bachelor's program. We have just substantially revised our bachelor's concentration (see Appendix One) and the new courses offered for both the BA/ degree and the MA/MS degree would fit together in strengthening both programs, while not deleteriously impacting either. For example, an expanded graduate program raises the level of our undergraduate education as many of our classes would have both undergraduate and graduate students in them.

Finally, we believe that the structure of this program will allow students to actually obtain their degrees in a reasonable time. Students will work closely with our internationally known faculty and design a program of study that will best meet their needs and prepare them for either further graduate study or desired employment. By keeping core courses and total credit hours to a minimum, this should prevent bottlenecks and institutional barriers to students getting through the program quickly with the skills and training they need for employment or continued graduate study.

Expected impact of proposal on existing campus programs:

This revised Master's degree program will not adversely impact existing programs or departments outside of the Department of Sociology and Anthropology, nor is intended to replace them. Rather, it will take advantage of the fact that individuals across campus, in many different fields, are working and teaching in areas that will benefit our revised program. This revised program would provide an interdisciplinary forum which would bring together faculty from across the university. The new revised M.A./M.S. in Anthropology would strengthen relationships with many other departments and units on campus, including Sociology, History, Geography-Geology, Biological Sciences, English, Chemistry, and the minors in East Asian Studies, Ethnic Studies, Cognitive Sciecne, and Religion.

Courses that will serve as electives are listed below (A = archaeology, B = biological anthropology, C= cultural anthropology, L = linguistics). However, a student can take any course with consent of his or her advisor. Statements of support from the directors/chairs of these schools and/or departments are included with this proposal.

Possible Sequence of Courses for a Student in Each Concentration

The following is a possible plan of study for students in each of the five concentrations in the Master's in Anthropology program (taking nine hours each semester based on the schedule of regularly offered anthropology courses). Possible electives taught outside of the Department are not included here—only regularly offered anthropology courses. Outside-department electives are acceptable and encouraged. Anthropology program graduate courses generally offered over a two-period are listed below in REGULAR type. Of these courses, some that a student might take for each concentration are given in

BOLD type. Required course are in BOLD ITALICS and elective courses in BOLD UNDERLINED type. Some summer field schools, independent studies, and internships and professional practicums are not listed, though these could be substituted for other courses with the approval of the Anthropology graduate advisor.
