RE: Proposal for Deletion of the Department of Technology Graphic Communications Sequence

The University Curriculum Committee has approved and is forwarding for Academic Senate review the attached Department of Technology proposal to delete the Graphic Communications Sequence from the Major in Industrial Technology.

The Department of Technology proposes deletion of the Graphic Communications Sequence, previously under the Major in Industrial Technology. This sequence has been replaced with the new Major in Graphic Communications approved in 2010. Technology did not request deletion of the sequence at the time they proposed the new major and this is now being done to clean up the catalog and work with the Registrar to disestablish sequences that have already become major technology programs.

The Department indicates that students in the current sequence, under earlier catalogs, will still have access to all courses necessary for them to complete the sequence.

If approved by the Academic Senate the sequence will be removed from the *2014-2016 Undergraduate Catalog*.
